

STANDARD FOR ERECTION OF MEMORIALS

INVERELL CEMETERY, NEW GENERAL SECTION

1. Headstones and bases of memorials to be durable natural stone (marble, granite, tracyte) not sandstone or artificial materials.
2. Bases not to exceed 1000mm by 450mm or less than 150mm thick.
3. Bases to be set back from edge of beam 150mm and in centre of plot. Headstone to be of a like material, set in 60mm from the back line of the base to maintain uniformity, and securely doveled and fixed.
4. No headstone and base to exceed 800mm in height.
5. Approved plaques may be fitted to tilted concrete bases provided such base does not exceed the surface area of such plaque. Such base is not to exceed 150mm at its highest point. Plaques may also be attached directly to headstones.
6. Double headstones may be erected provided they comply with the above requirements and are located centrally between the two plots.
